

# *Foot note*

*By Annalize Mouton*

**Sibling togetherness.** We did not go out and look for two more cats to add to our Fielie and Missy, but when the local animal doctor told us about these two that were facing oblivion, we had to extend a helping paw. Brother Graatjie (left) and sister Karossie show no signs of sibling rivalry; there is rather a very vocal distress signal when one or the other moves out of sight. After all, sleeping together is so much nicer than sleeping alone!
